BOYLSTON

Arrin & Smith

Medical Library.

Bookplate used by the Harvard
Schools of Medicine and Public
Health Library for books pur-
chased with the Boylston Medical
Library Fund. Received from the
Harvard medical library in 1958.

CATALOGUE OF BOOKS
IN THE
BOYLSTON
MEDICAL LIBRARY,
AT
HARVARD UNIVERSITY,
CAMBRIDGE.

INSTITUTED IN 1802.

REGULATIONS

OF THE

BOYLSTON MEDICAL LIBRARY.

- 1st. NO book shall be taken from the library without giving a receipt to the librarian.
- 2d. No book of plates shall be taken out, excepting as hereinafter provided.
- 3d. No person shall at any time have more than two books from the library.
- 4th. No book shall be kept out of the library longer than one month.
- 5th. In the delivery of books, the librarian shall be subject to such regulations and restrictions in addition to these regulations, as the medical professors, with the assent of the founder while living, and the corporation, shall prescribe.
- 6th. The persons entitled to the loan of books, shall be all such members of the Massachusetts Medical Society, as reside in the towns of Cambridge, Boston, Roxbury and Charlestown, or within ten miles of the college.

- 7th. The Students in medicine shall have access to the library during the continuance of the course of medical lectures, annually delivered, for the purpose of taking out one volume only at a time.
- 8th. In case it shall at any time be by the Medical Professors judged proper, and conducive to the advancement of medical science, that any work, contained in the library, shall be republished in this state, the copy of such work may be loaned, on condition, that the publisher be obligated to return the copy so loaned, bound as before, and to furnish four new copies of the work, either of the same edition, or of some later European edition, equally well bound, as the work reprinted from, that may be loaned for the purpose aforesaid.
- 9th. At such stated times as shall hereafter be determined, the librarian shall attend, for the purpose of admitting such gentlemen as wish it, to an inspection of the library, to examine plates, to peruse and take extracts from any of the books, (for which purpose pens, ink and paper are provided ;) and to view the preparations and other articles belonging to the anatomical Museum ; provided the said privileges be exercised in the presence of the librarian, or one of the medical professors.

10th. No fee or emolument *whatever*, beside the stated provision, which may be made by the corporation, shall accrue to the librarian, or any other person, from the individuals, to whom books shall be loaned, or from the visitors of the museum.

11th. Once every year in the month of August, the library shall be inspected by a joint committee of the corporation and overseers, together with one or more of the medical professors, at which time all the books shall be returned to the library.

12th. At the annual visitation of the above mentioned committee, minutes shall be made of all books missing and injured ; and the persons, to whom they were loaned, shall be required to replace them, or make compensation according to the judgment of the committee ; and in case of refusal or neglect to comply with such requisition, the privilege of taking out books shall be either forfeited, or suspended, as long as such neglect shall continue at the discretion of the committee.

13th. From the time of the annual visitation, to the commencement of the medical lectures, all books shall be retained in the library for the special use of the medical institution, and no books shall be loaned to any person, except-

ing to such students as are attendant on those lectures, until the close of the course.

14th. One important use of the medical library is to enable the medical professors, at all times, to communicate to the students in their lectures, such improvements and discoveries, as may be made in the various branches of Medical Science, or in the surgical art. The medical professors shall, therefore, at all times, have free access to the library, and shall be allowed to take out such books and plates as they may have occasion to use, excepting those the corporation shall specially prohibit, giving always a receipt to the librarian, notwithstanding any thing contained in the foregoing articles to the contrary.

15th. The Anatomical Museum shall be constantly under the inspection and direction of the Anatomical Professor, for the purpose of keeping it in a proper state of preservation and arrangement.

Samuel Webber President

CATALOGUE.

THE following is a Catalogue of Books in the Library of the Anatomical Theatre at Cambridge; for which the Institution is indebted to the munificence of WARD NICHOLAS BOYLSTON, Esq. The books have been selected with care; and among them is found a most valuable and extensive collection of plates. This Library is increasing through the liberality of its founder, and will hereafter excel, in number of works, as it now does in value, all similar foundations in New England.

ANATOMICAL Dialogues, 8vo. 7 sets,	
Albinus' Anatomical Tables, large imperial,	1
Adams' Essay on Vision, - -	1
Aitkins' Anatomy and Physiology, -	1
Abernethy's Surgical Essays, part 3d.	
----- Observations, -	1
Alley on Mercurial Diseases, - -	1
Austin on the Stone, .. - -	1
Alanson on Amputation, - -	1
Aphrodisiacus, folio, - - -	1
Aitkin on Fractures, - - -	1
Aitkin's Introduction to Physic and Surgery,	2
Astruc on the Venereal, 4to, - -	1

.....

Alpinus de Medicinâ Ægyptorum,	-	1
—— de Plantis Ægypti,	- - -	2
—— de Vitâ et Morte,	- -	1
—— de Medicinâ Methodicâ,	- -	1
Aretæus by Moffat,	- - -	1
Accum's Analysis of Minerals,	- -	1
Aurelianus de Morbis Acutis, 4to,	- -	1
Ægineta opera, folio,	- - -	1
Abstract of a Course of Lectures,	- -	1
Albinus (B. S.) Icones ossium fœtûs humani,		1
Bates' Dispensatory,	- - -	1
Butter on Infantile Fever,	- -	1
Baglivi Opera	- - -	1
Boerhaave Methodus Studii,	- -	2
Bell's Surgery,	- - - -	7
—— Dissections, folio,	- -	2
—— Anatomy,	- - - -	4
—— Charles, on the Heart and Arteries, quarto,		1
—— Andrew, Anatomia Britannica, large folio,		2
Baillie's Plates, 10 numbers, 4to.		1
Baillie's Morbid Anatomy, 8vo	-	1
Bell's Principles of Surgery, 4to,	- -	1
—— Plates of the Brain,	- -	1
—— Plates of the Nerves,	- -	1
—— on Wounds,	- - -	1
Beddoes' Hygeia,	- - -	3
—— Contributions,	- -	1
—— on Consumption,	- -	1
—— on Schrophula,	- -	1

Beddoes' Reports on Nitrous Acid,	-	1
———— Three Tracts		
———— and Watts on Factitious Airs,		2
